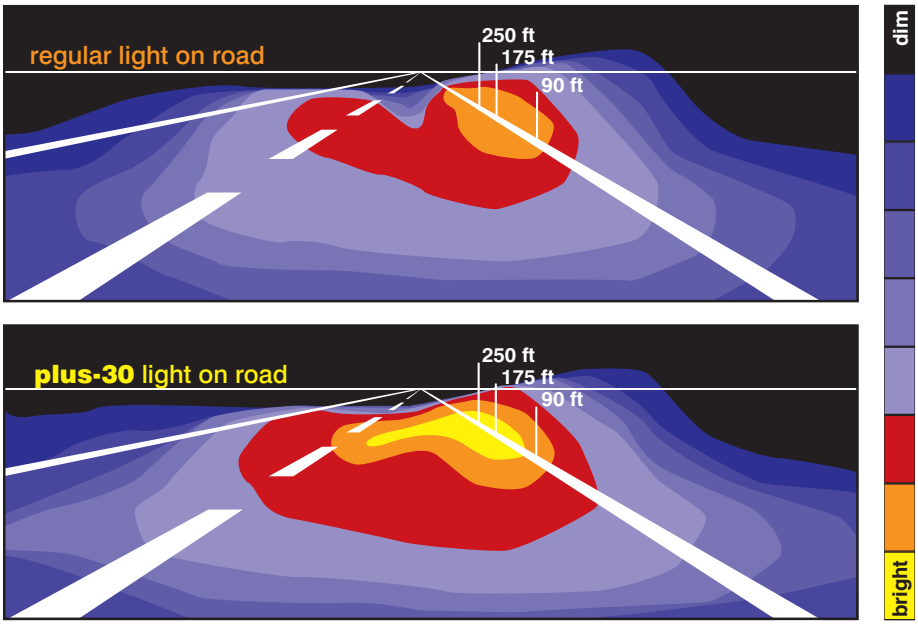
Xenon Bright Light Plus-30 High Efficiency Bulbs

Up to 30% more light! • Street legal • Finest quality

Beam reaches up to 3 car lengths farther than regular bulbs



Candlepower Xenon Bright Light Plus-30 high efficiency bulbs give the driver better visibility for enhanced safety and better driving performance at night and in poor weather. Tough independent tests prove these bulbs put up to 30 percent more light on the road, without dangerous overheating or electrical overloading. Obstacles and situations beyond 175 feet down the road can be seen sooner, giving more time to react. These bulbs comply with all DOT and ECE regulations for on-road use. The precision filament coil and Xenon gas ensure a long, brilliant life, while the UV-blocking glass makes them safe to use in plastic headlamps. All are manufactured under strict German supervision. The combination of superior quality, improved beam performance and affordable price means that Xenon Bright Light Plus-30 high efficiency bulbs offer excellent value for the money.

Type	Replaces	Watts	Lumens	Hours
