# NEW!

# The Whitest, Brightest, Sharpest Street Legal Motorcycle Headlight

Special polished steel reflector coated with pure aluminum

New Blue reflector coating turns white when light is on

Candlepower modified Z-beam pattern with clear glass optic lens

The newest German Ultra Lumen Xenon bulb

Candlepower is pleased to announce our new Super Bright Light Motorcycle Headlamps in the two most popular formats.

The Super Bright Light is an extra white headlight producing a 40% increase in whiteness while at the same time increasing the amount of light on the road. It does this with an innovative blue coating on the reflector and a special new German Xenon gas boosted clear halogen bulb. This new headlight offers a marked improvement over earlier technologies and avoids the possibility of filament distortion and possible extra glare associated with coated bulbs. The super Bright Light is legal for motorcycle use in all states and provinces.

**Distinctive Blue Acrylic Polymer Coated Reflector** This exceptionally rugged coating not only increases the color temperature (whiteness) of the light, but also provides additional corrosion protection. Ultraviolet protection helps prevent yellowing with age. The lamp produces the highly effective Candlepower modified Z-beam pattern. A clear glass optic lens completes the outer portion of the headlight.

**Unique Ultra Lumen H4 Bulb** The latest and most advanced German Xenon technology gives nearly fifty percent more light, while at the same time decreasing glare. The durable, long-lasting bulb increases visibility by up to sixty feet (20 m). This high technology bulb is being offered only for use in this lamp.

**Synergistic Effect** By combining the two latest technologies of color increasing reflector coating and a super lumen bulb, the result is the sharpest, most intense, bright white light ever to cover the road.

**More Noticeable In Traffic** This new light's blue-white appearance stands out from other headlamps. Recent studies show that blue-white light is almost fifty percent more noticeable to oncoming drivers. Your safety in traffic is improved.

**Completely Legal** Super Bright Lights meet all FMVSS 108 and CMVSS 108 requirements and are street legal for motorcycle use in all 50 states and Canada.

**More Esthetic Appeal** This light looks different. The exclusive blue tint of the reflector shows attractively even when the light is off.

**Available in 7" Universal and in 5 3/4" for Harley-Davidson.** Our part numbers are as follows:

CANDLEPOWER PART #	DESCRIPTION	SUGGESTED. RETAIL
702212SBL	7 Inch Super Bright Light Universal Conversion Kit*	\$71.50
